MANAGEMENT DISCUSSION AND ANALYSIS**DISCLAIMER**

Statements in the Directors' Report & Management Discussion and Analysis describing the Company's objectives, projections, estimates, expectations or predictions may be "forward-looking statements" within the meaning of applicable securities laws and regulations. Actual results could differ materially from those expressed or implied. Important factors that could make difference to the Company's operations include raw material availability and its prices, cyclical demand and pricing in the Company's principle markets, changes in Government regulations, tax regimes, economic developments within India and the countries in which the Company conducts business and other ancillary factors.

Overall Review

As per the latest GDP growth estimates, India economy grew by 7.4% in financial year 2015 compared to 6.9% in financial year 2014, mostly driven by improved economic fundamentals and revision of GDP methodology calculation. Even inflation showed signs of moderation, a welcome sign – wholesale price and consumer price inflation declined to 4.2% and 7.4% respectively, compared with last year's 6.3% and 10.1%. Reduced inflation, falling crude oil prices, stable rupee, improved purchasing power and consumer spending, higher capital inflows supported by the new government policy reforms have already put India on accelerating growth track and improved the business outlook.

However, deadlock in the parliament on key reforms and the prospect of taxation under MAT has led to short-term jitters in the market. Lack of pickup in credit growth due to high banking NPAs is a worrying sign. While the markets have reached record levels, showing great optimism, it remains to be seen whether it will be seen in the performance of industry sector.

OUTLOOK**Indian Market**

Textiles Industry has an overwhelming presence in the economic life of the country. Apart from providing one of the basic necessities of life, the textile industry also plays a pivotal role through its contribution to industrial output, employment generation and export earnings of the country. It contributes around 6% of India's GDP, 13% to India's industrial production and 11% to the country's export earnings & 27% of the foreign exchange inflows. Textile industry provides employment to 55 million people, which makes it the second largest employer in the country after Agriculture. The Industry has shown continued growth with a potential to increase its global trade share from the current 4.5% to 8% (USD 80 Billion) in the next 5 years supported by a rich abundance of raw material, skilled labour and talent.

India ranks amongst one of the largest producers of denim fabrics in the world with current Indian capacity exceeding 1.2 billion meters. There has been enhancement in capacities in a big way in short span of time. So, it will take some time to settle. From these capacities significant portion of this capacity is meant for exports. India's own consumption is estimated to be around 600-650 million meters per annum and is growing steadily with an annual growth rate in excess of 10%. However, during last 12 months or so denim industry is facing headwinds primarily owing to lack of adequate export demand, increasing competition even in export markets from Indian players and corresponding pricing pressures in the export realization. This has resulted into a temporary oversupply situation in this sector. This has put pressure on domestic price realization and hence on the operating profit margins of the Indian players. However, those players who have strong presence in the international market as well as strong domestic marketing set up have been able to perform relatively better. Since denim is a cyclical industry, the current bearish phase is likely to be followed by a bullish phase but the current recovery cycle seems to be fairly long and the time of recovery apparently looks to be uncertain.

Export Market

The medium to long term growth prospects of export markets for Indian denim industry are good, thanks to good quality cotton fibre available in India in abundance which is conducive for good quality denim fabrics and apparels coupled with low cost of production and textile policy initiatives/incentives both at the Central level as well as State level in case of some of the States who have come out with special incentive packages for textile industry in general including for the denim industry.

It is worth noting that China, Hong Kong, South Korea, Taiwan and Bangladesh have registered their presence significantly in the world denim textile market through conscious efforts while they continued to globalise their textile economy.

Future Prospects

Being the second largest employer in India coupled with strong industry linkages with the rural economy augurs Indian textile industry as one of the most significant sectors with an incremental growth potential. Rural economy has seen a spurt in income levels the last few years and this is right time to juxtapose their synergies to promote the Industry's growth. Being one of the key factors under the Government's "Make in India" campaign is a testimony to the huge growth potential the industry holds, both in terms of infrastructure development and skill improvement. Globally, favourable trade partners, improve its export competitiveness and contribute substantially to the nation's income.

The cost competitiveness of India, as compared to some of the other exporting countries in Asia (e.g. China) has improved over recent years. The growth prospects are constrained by many challenges including rising input costs, restrictive labour laws and intensified competition from other low cost countries like China and Bangladesh. Such issues need to be addressed to result in unblocking maximum industry growth potential.

As mentioned earlier, while denim industry is currently passing through a rough patch of a fairly long bearish phase of business cycle, considering inherent advantages enjoyed by textile sector in India in general and the benefits enjoyed by denim industry in particular, the medium to long term prospects of denim industry appear to be reasonably good. However, a consistent and rapid expansion in the capacities by the existing/new players can become a major concern area if the demand does not catch up at the same speed (as is presently witnessed today) and if the global macro economic factors do not improve within a reasonable period of time.

SWOT Analysis of Denim Industry**Strengths**

Opportunities

- Growing domestic and international markets demands.
- Indian market is most reliable and efficient market for US, Europe & UK. Buyers.
- Product mix and product diversification.

Threats

- Entry of multinational in domestic markets.
- Demand supply mismatch, resulting into oversupply position in Domestic Market
- Stiff competition from other Asian countries such as China, Indonesia, Thailand, Bangladesh and Pakistan.

The Company has the insurance policies of all the affected assets, so the Company has lodged claims with the insurance companies which claims include claim towards loss of the above stated assets and the Management believes that the amount of the claim has been ascertained as per the terms of the insurance policies and is certain about recovery of the claim based on its understanding of the terms of the insurance policies and related discussions with the representatives of the insurance companies at the time of putting up the claim. The carrying value of the assets destroyed in fire is estimated by the management at ₹1,732.21 lacs. The loss has been accounted for in the books of the Company and the amount of the insurance claims of ₹ 1,477.64 lacs has been recognized as revenue in the Statement of Profit & Loss.
